EPIC

Epic Global Group Limited

ABOUT EPIC

From local roots in Herefordshire, Epic Global Group has expanded to become a successful electrical and mechanical company with global experience.

We pride ourselves on our dedicated customer service, which is demonstrated by our loyal customers who use our services time and time again.

Epic Global Group have more than 10 years' experience of working in countries across the globe on many successful projects of varying sizes.

David Evans
CEO, Epic Global Group

TESTIMONIALS

Epic were extremely professional and prompt considering I had other trades to coordinate with the build work I had going on. They always managed to arrive in a timely fashion and had no difficulty in getting to grips with the next phase of the electrical installation, and noted when they would come for further work to be conducted. If there were any unforeseen circumstances which more often than not are impossible to anticipate, they always immediately advised of these changes. Their standard of work is top notch.

I cannot recommend them highly enough.

Mr & Mrs Pigou

I was very happy with Epic and the engineers who attended the job. They were all very pleasant, efficient and tidy.

Mrs Suckling
Hereford

Epic men worked late to get it finished tonight. Really have to say they are the best pair of workers we have met, worked well together calmly and quietly, were kind, polite and considerate to us, checked everything over before they left and cleared up as well.

Definitely a credit to their Mums

Mrs Jenkins
Leominster

OUR SERVICES

Our committed team of employees have developed specialist skills in key areas. We offer a range of electrical, plumbing and mechanical engineering services for the domestic and commercial customer.

**PLUMBING
& HEATING**

**ELECTRICAL
SERVICES**

**RENEWABLE
ENERGY**

ELECTRICAL SERVICES

We've worked with hundreds of homeowners over the past ten years and carried out all forms of electrical services from small domestic tasks to large scale projects across the UK.

We can advise you if you're looking to upgrade your lighting, install heating systems with smart controls, create new electrical circuits or secure your home with the latest security alarm systems.

We understand that having work done on your home can be an inconvenience, and as such go the extra mile to ensure we work with you to minimise any disruption - we have even been known to work on a Sunday evening to fit in with our clients!

We often work with Principal Contractors to fit out new properties with heating and electrical circuits – always working with the needs of our clients. As a member of the NICEIC and CHAS Approved Contractor Schemes, we can also provide a range of regulatory services, including Landlord certificates (EICR), building control registered documents and Condition Reports.

PLUMBING & HEATING SERVICES

Finding a good plumber can be difficult and once you've found one you want to hang on to them - this is why the majority of our work comes through existing customers.

If you need your boiler serviced or have a problem with your heating then Epic Global can help you out.

Our core business is working with other businesses who need to install cold or hot water systems, heating appliances and even specialist research instruments. Our Heating and Mechanical engineers have done it all before but take pride in every single project – big or small.

For Landlord's requiring certification services we can provide Gas Safe and Oftec certificates.

RENEWABLES & ENERGY EFFICIENCY

Epic have worked alongside a number of sustainable energy companies who chose to use our electrical and heating services to complement their own system design knowledge.

We have worked with award-winning companies to install Solar PV (photovoltaic), Solar Thermal (hot water), Air Source Heat Pumps and Biomass boilers.

We can recommend a Renewable Energy company who will take care of the design and accreditation, while we do what we do best – high quality installation.

With the demand in electrical vehicles rising, we have installed hundreds of EV chargers for our customers over the years.

PROJECTS

We have worked in some gorgeous homes with fabulous homeowners.

We recently upgraded the lighting and heating controls in these properties. We treat your home with respect - remembering the extra details like taking our shoes off and hoovering up any debris afterwards!
